DATA MANAGEMENT STRUCTURE !!

King Folder → Programming

King Folder branches to:
- F_1 (core folder)
- F_2
- F_3
- F_4

F_2 branches to:
- F_{21} (circled)
- F_{22}

F_{21} branches to:
- F_{0211}
- FiL
- $Fi2$
- Readme (circled)

F_3 branches to:
- F_{31}
- F_{32}
- F_{33}

F_4 branches to:
- F_{41}
- F_{42}

Readme:
- $Fi(1)$
- $Fi(2)$
- $Fo(211)$

ID = 1123
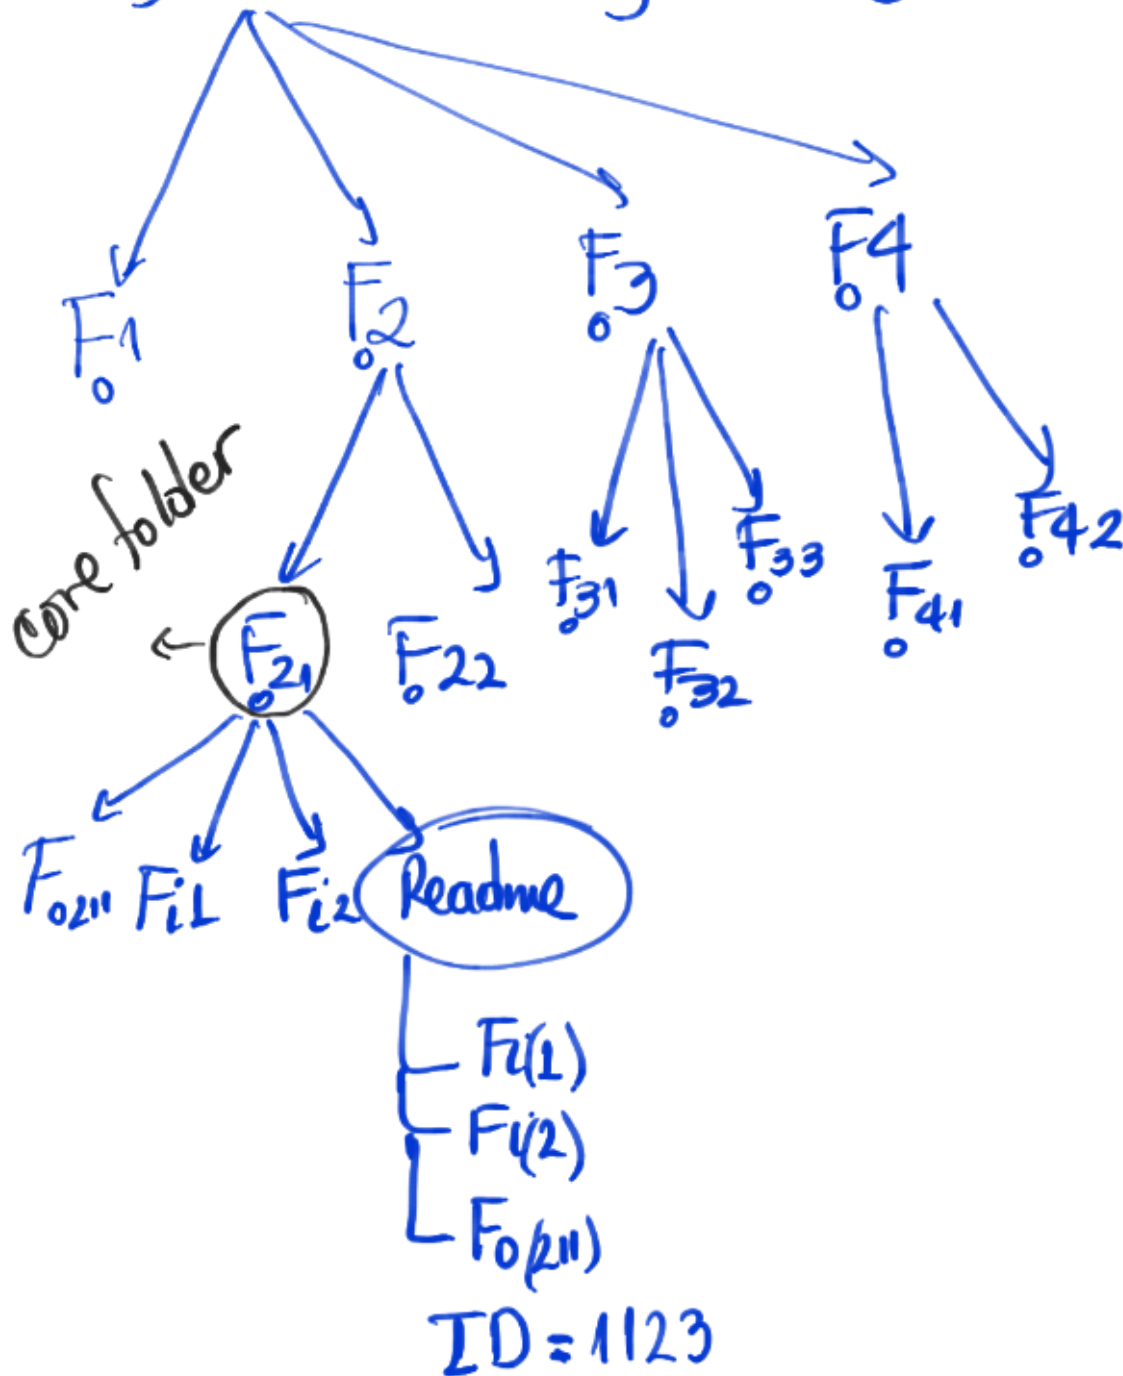

Core Folders.txt

ID	PATH	Description	# Mods.
1123	$K/F_2/F_{21}$	-----	0

Log.txt

- Errors about content in readme vs content in Folder
- Errors about missing descriptions in readme.txt

Reference in Readme files using core folders ID.

Conditions to keep the system consistent

→ A folder with readme file should not be inside another folder that had a readme above

→ If a core folder is to be moved, all the files within the readme file should go together in a new folder. It can be moved anywhere except in a folder that already has a readme file.

Run Data Management script daily
